ENVIRONMENTAL SERVICE PROVIDER

OUR MISSION TO GREEN VISION

@envirovision.ae

ABOUT US

We started Our Mission with a good intention to initiate Green Environment by understating the necessities of Waste Generators and serving them to manage their waste properly in Eco-friendly manner. We are specialized in handling different types of Hazardous and Non-Hazardous Waste Materials depends on category by strictly following the Rules, Regulations of Regulatory/Local Authority with qualified Personals, Equipment and Standard Operating Procedures.

Our strategy to Prevent, Reduce, Reuse, Recycle, Energy Recovery & Safe Disposal is helping Environment for better tomorrow and saving huge financial expenditure for waste disposal. Having been active in this mission, we have built strong, long-term relationships with our customers-base and fulfill the importance of a reliable service every time. We claim ourselves on excellent customer service and a longing to constantly improve our internal process, which helps us offer the very best service in terms of affordability, timing and results.

REDUCE

REUSE

RECYCLE

RECOVERY

**Our core value is to deliver our services
by committing 4Rs Principles**

Our Innovation The development of waste recycling and energy recovery processes is in line with an increasingly stringent regulatory framework that aims to limit the quantity of waste stored in landfills. It is also a means of forestalling depletion of non-renewable resources. The main priority in this segment is to increase the recycling of designated materials by developing specialized reclamation and recycling options.

Our Strategy & Vision Vision Statement: Our Vision is to be a leading specialized Environmental Company, bringing sustainable solutions to all aspects of our intervention, research, and solutions we provide. Mission Statement: Our Mission is to bring practical solutions to challenges faced by Public and Private Sectors relative to their Environmental service requirements in achieving developmental and growth targets by providing technical assistance and consulting services to our valuable clients within the Emirate of Abu Dhabi. Based on the concept of continuous improvement, we opt to collaborating with local partners to whatever concerns Environmental topics and projects.

WE SUPPORT

- Recycle Waste Management Services
- Non-Recycle Waste Management Services
- Compostable Waste Management Services
- Hazardous Waste Management Services
- Liquid Waste Management Services

Recycle Waste Management Services

With the policy to 'Recycle' after 'Reuse' and to comply the Waste Reduction Plan, we are offering enhanced solution for all type of your Recyclable Waste Materials by undertaking complete responsibility from source of collection till receiving facility approved by Regulatory Authority for each stream of waste.

By understanding the common concern and considering feedback from our Customers regarding the technical difficulties of managing storage space for segregation to achieve the target percentage of Recyclable Material, we are providing suitable storage containers/stations subjected to waste stream with expected volume of waste generation.

Non Recycle Waste Management Services

One of the major challenges is to manage Non-Reusable/Recyclable/Recoverable waste which needs to be disposed without disturbing the rhythm of Environment and life style occupied in it. By understanding the hereditary behavior of waste stream in detail, we are providing suitable solutions for the collection, transportation and safe disposal of such streams of waste by strictly following Landfill Directive's guideline with Regulations implemented by Sector Regulatory Authority.

Respecting the impact of Environment with this stream of waste materials and to avoid pollution to Land, Air and Water Bodies, we are also providing customized storage containers subjected to space limitation with volume of waste expected to generate.

Compostable Waste Management Services

Utilizing the technology of converting some stream of wastes to fertilization/raw materials, we are offering services to our Customers to implement waste conversion process to minimize the volume of waste transferring to Landfill. Following the terms and conditions implemented by Regulatory Authority and Receiving Facility, we are authorized to handle Organic Wastes and providing different type of storage containers/collection trucks by understanding the requirement of our Customers.

Hazardous Waste Management Services

Absolute hazardous entries are those that are always considered hazardous, whatever the level of hazardous substance they contain. Minor Entries are those where testing may be required to determine the dangerous properties against the threshold stated.

With the slogan 'cradle to grave', we are undertaking the responsibility of managing your hazardous waste by deeply studying the nature of material, chemical composition and its potential reactions from its referral document (MSDS/Valid Analysis Report) with material survey by qualified professional. Depends on the hazardous nature of material with tendency of reaction, we are providing suitable storage/packaging methods approved by Regulatory Authority and Disposal Facility to avoid spillage/contamination at collection location. Our team is fully certified to handle hazardous waste in the sense not to take any type of risk during Collection, Transportation and Recycle/Safe Disposal process.

Used Oil Management Services

With the policy to reserve natural resource, we are offering specialized services for the storage, collection, refining and reuse of used oil/lubricants by following the code of practice implemented by Local/Regulatory guidelines without harming the sustainability of Environment. We are handling all type of used lubricants which generates from auto machineries, industrial, aviation, marine/vessel division etc.

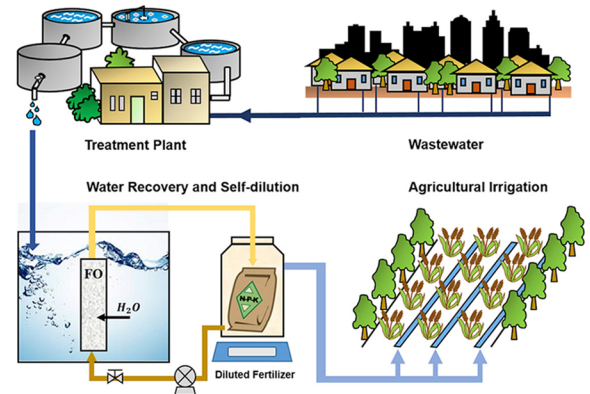

Liquid Waste Management Services

We are providing suitable solutions for the storage and safe disposal of waste water generated from various sources (including Industrial, Commercial, Residential clients). Depends on the nature of waste water with frequency of generation, our specialized services includes the provision of storage tanks (underground & surface tanks) with removal and disposal of waste water as per Local/Regulatory guidelines.

Process Chart
(Standard Method of Waste Water Process System)

Our Resources

We are providing enhanced solutions for the safe storage and collection of all solid/liquid waste materials depends on its nature, volume of generation with storage space limitations. Upon site surveys and feedback from our Customers, we customized our storage containers with sizes starting from 20 Liters to 30 Cubic Meters which mainly including Mini Storage Bins (HDPE & Galvanized with/without pedal), Skip Containers (with/without lid), Roro Containers, Static Compactors, Portable Toilets with storage tanks, Lube Oil Tanks, Sewage/Contaminated Water Storage Tanks etc

Our Team

Employees are backbone of all organization, by respecting that fact we are glad to announce our skilled employees are highly motivated and committed to give their best services to complete the assignments within the time frame by fully respecting the QHSE, Regulatory Policies by following standard SOPs. All our staffs are pre-screened and selected by assuring the way of their approach, dedication towards work, work knowledge with confidence, which ensures our customers to handle their requirements/concerns and complaints in more professional manner. Our team from Management level to Ground Level is fully competent with responsibility and it's our key success in this firm. Our entire team is ready to assist you any time in the field of Environmental Services

Waste Storage Units

It shall be the duty and responsibility of every person in possession, charge or control of any organization/community where garbage or refuse is created or accumulated to at all times keep or cause to be kept adequate portable storage containers of approved size, type and construction and to deposit or cause to be deposited all garbage, rubbish or waste in said storage containers. So by studying the strategy of various requirements from several points we are offering various types of storage units (example shown on below picture)

Recycle Waste Storage Units

In order to achieve the target of waste reduction within organization/ community it's necessary to implement proper Waste Management Plan of segregation and recycling along with adequate type, size of storage containers for different streams of waste. In order to promote 100% segregation, we are providing storage bins of different types, colours, and sizes with posters showing the type of waste depends on the requirement from our Customers.

Specialized Fleet Arrangements

We render to our Customers not only the professional service but also permanent informing on the current status of service order with us and we are providing the guarantee of timely and safe services with the help of our qualified Logistic Team. Our modern supervising/tracking systems guarantee solid safety and adequate control of the services entrusted to us. Depending on the sizes of waste storage units, volume of waste and type of waste material we are providing skip loader, hook loader, dumper truck, refuse compactor vehicle, pickup, vacuum tanker etc.

Our Mission

Our Mission is to bring practical solutions to challenges faced by Public and Private Sectors relative to their Environmental service requirements in achieving developmental and growth targets by providing technical assistance and consulting services to our valuable clients within the Emirate of Abu Dhabi.

Based on the concept of continuous improvement, we opt to collaborating with local partners to whatever concerns Environmental topics and projects.
